The number of wooden or iron military loading bridges and U-beams and  
rails suitable for the loading of military vehicles will be registered  
immediately. The result of the count, broken down according to indi-  
vidual railroad stations, will be communicated to the Erfurt railroad  
headquarters, telephone 1238, by 11:00 a.m. on 14 November 1950.

\* Comment. The loading devices are used for the loading of vehicles  
from loading ramps to railroad cars or vice versa and for the transfer  
of vehicles from one railroad car to another. It is believed that the  
railroad decree was issued by order of the Soviets. It is not known  
whether similar orders were also given to the other railroad districts.
